10. EZ Web is without knowledge or information sufficient to form a belief as to the truth of the allegations in Paragraph 10 of the Complaint.

11. EZ Web admits that a purported copy of U.S. Patent No. 10,600,101 (the “'101 Patent”) is attached to the Complaint as Exhibit A and that the face of that patent indicates that it is entitled “Systems and Methods for Indicating the Existence of Accessible Information Pertaining to Articles of Commerce.”

12. EZ Web denies the '101 Patent is valid and enforceable. EZ Web is without knowledge or information sufficient to form a belief as to the truth of the remaining allegations in Paragraph 12 of the Complaint and, on that basis, denies all such allegations.

13. EZ Web denies the allegations in Paragraph 13 of the Complaint.

#### **[PLAINTIFF'S] PRAYER FOR RELIEF**

EZ Web denies the Plaintiff is entitled to any relief from EZ Web and denies all the allegations contained in Paragraphs (a)-(e) (including any subparts) of Plaintiff's Prayer for Relief.

#### **AFFIRMATIVE DEFENSES**

EZ Web's Affirmative Defenses are listed below. EZ Web reserves the right to amend its answer to add additional Affirmative Defenses consistent with the facts discovered in this case.

### **FIRST AFFIRMATIVE DEFENSE**

EZ Web has not infringed and does not infringe, under any theory of infringement (including directly (whether individually or jointly) or indirectly (whether contributorily or by inducement)), any valid, enforceable claim of the '101 Patent.

### **SECOND AFFIRMATIVE DEFENSE**

Each asserted claim of the '101 Patent is invalid for failure to comply with one or more of the requirements of the United States Code, Title 35, including without limitation, 35 U.S.C. §§ 101, 102, 103, and 112, and the rules, regulations, and laws pertaining thereto.

### **THIRD AFFIRMATIVE DEFENSE**

To the extent that Plaintiff and any predecessors in interest to the '101 Patent failed to properly mark any of their relevant products or materials as required by 35 U.S.C. § 287, or otherwise give proper notice that EZ Web's actions allegedly infringe the '101 Patent, EZ Web is not liable to Plaintiff for the acts alleged to have been performed before EZ Web received actual notice that it was allegedly infringing the '101 Patent.

### **FOURTH AFFIRMATIVE DEFENSE**

To the extent that Plaintiff asserts that EZ Web indirectly infringes, either by contributory infringement or inducement of infringement, EZ Web is not liable to Plaintiff for the acts alleged to have been performed before EZ Web knew that its actions would cause indirect infringement.

### **FIFTH AFFIRMATIVE DEFENSE**

The claims of the '101 Patent are not entitled to a scope sufficient to encompass any system employed or process practiced by EZ Web.

### **SIXTH AFFIRMATIVE DEFENSE**

To the extent Plaintiff contends that it alleges a claim for indirect infringement (whether by inducement or contributorily), Plaintiff has failed to state a claim upon which relief can be granted.

**SEVENTH AFFIRMATIVE DEFENSE**

Plaintiff's Complaint fails to state a claim upon which relief can be granted because the '101 Patent does not claim patent eligible subject matter under 35 U.S.C. § 101.

**EIGHTH AFFIRMATIVE DEFENSE**

Plaintiff's Complaint fails to state a claim upon which relief can be granted because, among other things, Plaintiff has not stated a plausible allegation that any system employed or process practiced by EZ Web comprises: "a mobile device comprising a portable handheld housing and a communication interface configured to enable the mobile device to communicate with a communication network, the mobile device further comprising a signal processing device and a visual input device, the visual input device affixed within the portable handheld housing"; "digital files associated with the mobile device"; "a server in communication with the communication network, the server comprising a server database configured to store a look-up table that includes at least a plurality of bar codes associated with a plurality of articles of commerce, the look-up table also storing a plurality of information link indicators, each information link indicator associated with a respective bar code and article of commerce, and each information link indicator being configured as a status signal indicating the existence or absence of a link to information pertaining to a respective article of commerce, the link being made to the information via the communication network"; and "wherein the visual input device is configured to scan an image of an article of commerce, decode the image to obtain a bar code and forward data from the scanned image to the signal processing device"; and "wherein, in response to receiving the bar code, the signal processing device is configured to look up the bar code in the look-up table to determine from a respective information link indicator whether or not a link exists for accessing information pertaining to an article of commerce associated with the bar code via the communication network"; as required by Claim 1 of the '101 Patent.

**NINTH AFFIRMATIVE DEFENSE**

Plaintiff is estopped, based on statements, representations, and admissions made during prosecution of the patent application resulting in the asserted patent, from asserting any

interpretation of any valid, enforceable claims of the '101 Patent that would be broad enough to cover any accused product alleged to infringe the asserted patent, either literally or by application of the doctrine of equivalents.

#### **TENTH AFFIRMATIVE DEFENSE**

Plaintiff's claims for damages are statutorily limited or barred by 35 U.S.C. §§ 286 and 287. Plaintiff is further barred under 35 U.S.C. § 288 from recovering costs associated with its action.

#### **ELEVENTH AFFIRMATIVE DEFENSE**

Plaintiff is precluded from recovering its reasonable attorney's fees, costs, and or increased damages under 35 U.S.C. §§ 284 or 285.

#### **TWELFTH AFFIRMATIVE DEFENSE**

Should EZ Web be found to infringe any valid, enforceable claim of the '101 Patent, such infringement was not willful.

#### **EZ WEB'S COUNTERCLAIMS**

For its counterclaims against Plaintiff Scanning Technologies Licensing LLC ("Scanning Technologies"), Counterclaim Plaintiff EZ Web Enterprises, Inc. ("EZ Web"), alleges as follows:

#### **PARTIES**

1. Counterclaim Plaintiff EZ Web is an entity organized and existing under the laws of Nevada. EZ Web has no principal place of business, its current President and CEO resides in the state of California.

2. Upon information and belief based solely on Paragraph 3 of the Complaint as pled by Plaintiff, Counterclaim Defendant Scanning Technologies Licensing LLC is a corporation organized and existing under the laws of Texas that maintains its principal place of business at 1801 NE 123 St., Suite 314, Miami, FL 33181.

#### **JURISDICTION**

3. EZ Web incorporates by reference Paragraphs 1–2 above.

4. These counterclaims arise under the patent laws of the United States, Title 35,

5. Scanning Technologies has consented to the personal jurisdiction of this Court at least by commencing its action for patent infringement in this District, as set forth in its Complaint.

6. Based solely on Scanning Technologies’ filing of this action, venue is proper for purposes of these counterclaims in this District pursuant at least 28 U.S.C. §§ 1391 and 1400.

### **COUNT I**

#### **DECLARATION REGARDING NON-INFRINGEMENT OF THE ’101 PATENT**

7. EZ Web incorporates by reference Paragraphs 1–6 above.

8. Based on Scanning Technologies’ filing of this action and at least EZ Web’s first affirmative defense, an actual controversy has arisen and now exists between the parties as to whether EZ Web infringes U.S. Patent No. 10,600,101 (the “’101 Patent”).

9. EZ Web does not infringe at least Claim 1 of the ’101 Patent because, *inter alia*, the accused system does not comprise: “a mobile device comprising a portable handheld housing and a communication interface configured to enable the mobile device to communicate with a communication network, the mobile device further comprising a signal processing device and a visual input device, the visual input device affixed within the portable handheld housing”; “digital files associated with the mobile device”; “a server in communication with the communication network, the server comprising a server database configured to store a look-up table that includes at least a plurality of bar codes associated with a plurality of articles of commerce, the look-up table also storing a plurality of information link indicators, each information link indicator associated with a respective bar code and article of commerce, and each information link indicator being configured as a status signal indicating the existence or absence of a link to information pertaining to a respective article of commerce, the link being made to the information via the communication network”; and “wherein the visual input device is configured to scan an image of an article of commerce, decode the image to obtain a bar code

and forward data from the scanned image to the signal processing device”; and “wherein, in response to receiving the bar code, the signal processing device is configured to look up the bar code in the look-up table to determine from a respective information link indicator whether or not a link exists for accessing information pertaining to an article of commerce associated with the bar code via the communication network.”

10. Pursuant to the Federal Declaratory Judgment Act, 28 U.S.C. § 2201 *et seq.*, EZ Web requests a declaration by the Court that EZ Web has not infringed and does not infringe any claim of the ’101 Patent under any theory (including directly (whether individually or jointly) or indirectly (whether contributorily or by inducement)).

## **COUNT II**

### **DECLARATION REGARDING INVALIDITY**

11. EZ Web incorporates by reference Paragraphs 1–10 above.

12. Based on Scanning Technologies’ filing of this action and at least EZ Web’s Second Affirmative Defense, an actual controversy has arisen and now exists between the parties as to the validity of the claims of the ’101 Patent.

13. The asserted claims of the ’101 Patent are anticipated and/or rendered obvious by, *inter alia*, U.S. Patent No. 8,489,598 and U.S. Patent No. 8,457,449.

14. Pursuant to the Federal Declaratory Judgment Act, 28 U.S.C. § 2201 *et seq.*, EZ Web requests a declaration by the Court that the claims of the ’101 Patent are invalid for failure to comply with one or more of the requirements of United States Code, Title 35, including without limitation, 35 U.S.C. §§ 101, 102, 103, and 112, and the rules, regulations, and laws pertaining thereto.

### **PRAYER FOR RELIEF**

WHEREFORE, EZ Web asks this Court to enter judgment in EZ Web’s favor and against Scanning Technologies by granting the following relief:

- a) a declaration that the ’101 Patent is invalid;
- b) a declaration that EZ Web does not infringe, under any theory, any valid claim

of the '101 Patent that may be enforceable;

- c) a declaration that Scanning Technologies take nothing by its Complaint;
- d) judgment against Scanning Technologies and in favor of EZ Web;
- e) dismissal of the Complaint with prejudice;
- f) a finding that this case is an exceptional case under 35 U.S.C. § 285 and an award to EZ Web of its costs and attorneys' fees incurred in this action; and
- g) further relief as the Court may deem just and proper.

EZ Web hereby demands trial by jury on all issues.
